Product Description

Product Description:

Stainless steel welded pipe is a round pipe welded by welding machine with stainless steel material. It is an economic and environment-friendly pipe with characteristics of high strength, corrosion resistance, and weldability. It is widely used in the industries of petroleum, chemical, medical, food, light industry, machinery, instrument, construction, nuclear power, aerospace, military, etc.

The welding line type of stainless steel welded pipe covers ERW, LSAW, SSAW and other types, and the standard is ASTM, AISI, DIN, EN, GB, JIS and other standards. The minimum order quantity is 2 tons, and the thickness can be customized according to customer requirements. The stainless steel welded pipe has passed ISO, SGS, BV and other certifications.

We specialize in the production of stainless steel welded round pipes, stainless steel welded pipes and stainless steel welded pipes for sale. Our products are of superior quality, reasonable price and fast delivery. We have won wide recognition and praise from the majority of users.

Features:

Product Name: Stainless Steel Welded Pipe

Certification: ISO, SGS, BV, Etc.

Outer Diameter: Customized

Type: Welded Pipe

MOQ: 2 Ton

Wall Thickness: Customized

Features: stainless steel welded steel pipe, stainless steel pipe distributors, stainless steel welded steel pipe suppliers

Applications:

Stainless Steel Welded Pipe - jans-steel

Tai-steel's stainless steel welded pipe is made of 304, 304L, 316 and 430 stainless steel materials that are certified with ISO9001. The minimum order quantity is 5 tons and the price is 2900\$. It usually takes 15 working days for delivery.

At Tai-steel, all stainless steel welded pipe are customized, ensuring the perfect fit for your needs. The size and length of the pipe can be adjusted according to your specific requirements.

Our stainless steel welded pipes are widely used in fluid pipes, structure pipes and more. They are highly durable and corrosion-resistant, making them ideal for industrial and commercial applications.

If you are looking for high-quality welded stainless steel round pipe, stainless steel welded pipe or stainless steel welded steel pipe, jans-steel is your best choice.

Price: 2900\$

Delivery Time: 15 working days

Application: Fluid Pipe, Structure Pipe, Etc.

Size: Customized

MOQ: 2 Ton

Ends: Plain, Beveled, Threaded, Etc.

Welding Line Type: ERW, LSAW, SSAW, Etc.

Our **welded stainless steel round pipe** is made of high quality stainless steel and offers excellent corrosion resistance, durability and strength. We provide **welded stainless pipe for sale** with various specifications, sizes, and shapes. Our **stainless steel welded steel pipe** is available in a variety of materials and can be customized according to customer's requirements. The **stainless steel welded tubing** is suitable for applications in the fluid pipe, structure pipe, etc., and can be used in a variety of industries. We will provide you with the best quality products and services.

Support and Services:

Stainless Steel Welded Pipe Technical Support and Service

At XYZ, we provide the highest quality of technical support and service for our Stainless Steel Welded Pipe products. Our technical support team is available to answer any questions and provide solutions to customer inquiries. Our experienced staff is available to assist with installation and troubleshooting, as well as provide advice on maintenance and safety.

We offer comprehensive services for Stainless Steel Welded Pipe products, including:

[Product selection and guidance](#)

[Installation and commissioning](#)

[On-site maintenance and repair](#)

[Technical advice and training](#)

[Computerized system integration](#)

At XYZ, we are committed to providing our customers with the highest level of technical support and service for our Stainless Steel Welded Pipe products. Our experienced team of experts are ready to assist you in any way possible.

Packing and Shipping:

Packaging and Shipping

Stainless Steel Welded Pipes are generally packaged in bundles of 20 feet (6 meters). The exact length of the pipes can be customized according to customer requirements. The packaging materials used for the pipes are of good quality and are designed to ensure that the pipes are not damaged during transportation. The pipes are shipped in containers, which are loaded onto ships for transportation. Depending on the size and weight of the pipes, multiple containers may be used to ship the pipes. All necessary precautions are taken to ensure that the pipes are securely loaded and transported to the destination without any damage.
